

Notation: hollow ball = provided interface; semicircle = required interface; solid stems = assembly connection.
Requests go from consumer (socket) to provider (ball); results return through the same interface.

Checkout flow

1. Read menu and prices 2. Select coffee and size 3. Authorize credit card 4. Print receipt after approval
- Declined payment: show failure. Printer failure after payment: retry printing without charging again.

Logical layers within one kiosk application. External payment authorization may require network access.
